

CONTRACTOR EDITION

TEST DRIVE THE ANCHOR APP

anchor-sales-copilot.vercel.app

Thanks for helping us test the new **Anchor App** before launch. You're on roofs more than anyone — we want your eyes on three tools: the **Resource Library** (install guides, spec sheets, CAD files), the **AI Co-Pilot**, and the **Rooftop Equipment Consult (REC)**. Try it where you'd actually use it — on a job, in the truck, or at the office. **Takes about 15–20 minutes.**

1. ADD IT TO YOUR PHONE (2 min)

APPLE IPHONE / IPAD Safari browser

- 1 Open **Safari** and go to **anchor-sales-copilot.vercel.app** (or scan the QR code above).
- 2 Tap the **Share** button at the bottom (or top) of the screen. 
- 3 Scroll down and tap **Add to Home Screen** 
- 4 Edit the name if you like, then tap **Add** in the top-right corner.
- 5 The **Anchor icon** now appears on your home screen. Tap it to launch.

ANDROID PHONE / TABLET Chrome browser

- 1 Open **Chrome** and go to **anchor-sales-copilot.vercel.app** (or scan the QR code above).
- 2 Tap the **three-dot menu** in the top right corner 
- 3 Tap **Add to Home Screen** (or **Install app** if shown).
- 4 Confirm the name, then tap **Add** — choose **Add** automatically if prompted.
- 5 The **Anchor icon** now appears on your home screen. Tap it to launch.

2. SIGN IN (NO PASSWORD)

1. Open the app — tap **Sign in to Anchor**.
2. Enter your **work email**, send the code.
3. Enter the **8-digit code** from your email (check spam).
4. You're in — no password to remember.

3. SET UP YOUR PROFILE

Open **Settings** and confirm your **name**, **company**, and **phone** so anything you submit comes through with the right info.

CONTRACTOR EDITION

WHAT TO TEST

Run through the three tools below and note anything **confusing, slow, broken, or worded oddly**. Try the app where you'd actually use it — on a job, in the truck, with gloves on if you can.

RESOURCE LIBRARY

Every Anchor product, every install guide, every spec sheet — on your phone.

- ☐ Find an **installation guide** for a product you actually install.
- ☐ Find a **spec sheet** you'd want to pull up on a job or send to a GC.
- ☐ Was it easy to get to on your phone? Anything you couldn't find?

CO-PILOT

Useful when you're on a job and need an answer fast.

- ☐ Ask a real question you'd hit on a job — e.g. "what do I use to secure a condenser on a TPO roof?" or "can I use a U-Anchor on an EPDM recover?"
- ☐ Was the answer helpful and correct? Did it point you to the right install guide or spec sheet?

ROOFTOP EQUIPMENT CONSULT (REC)

Get a real attachment recommendation back from the Anchor team — especially useful when you're looking at a roof and aren't sure which Anchor product is the right fit.

- ☐ Submit a **test REC**. Use photos from a recent job (or take a couple next time you're on a roof) and describe what you're trying to secure.
- ☐ Was the form clear about what it needs? Did the photos upload cleanly?
- ☐ Anything that would make this faster or easier to use in the field?

GIFT CARD REWARDS

Share your feedback on the app and we'll send you a **\$50 gift card** as thanks for helping shape the launch.

ROOFTOP EQUIPMENT CONSULT (REC)

In the app: open **Support**, describe what happened, and attach a screenshot.

Or directly: email marketing@anchorp.com

For anything off, tell us **what you were doing, what you expected, and what actually happened** — a screenshot helps a lot.

Please send feedback by **August 1, 2026**. Thank you — this directly shapes what we fix before launch.
